SUMMARY

A self-motivated and enthusiastic Career Shifter who recently graduated in a 2-month *Full-Stack Web Development* course at Zuitt-Coding Bootcamp Philippines is currently looking for a Software Engineering position in the IT industry. An organized and flexible former engineer/supervisor with 8+ years' proven working experience in his previous field. Highly qualified in any roles in a progressive organization that is fast-paced and challenging.

EXPERIENCE

Student, Full-Stack Web Development

Sept 03, 2022 – Nov 21, 2022 (2 months)

Zuitt - Coding Bootcamp Philippines

A web development bootcamp focusing on both front-end and back-end technologies.

Successfully created 3 capstone projects using the technology learned throughout the training.

Capstone 3 Project: **E-commerce MERN App**

- Built E-commerce App using MERN Stack (MongoDB, Express, ReactJS and NodeJS).
- Created frontend application using ReactJS.
- Integrated the API from Capstone 2 with the frontend application developed using ReactJS.
- Hosted both applications in Vercel and Render.

Capstone 2 Project: **E-commerce API**

- Built a backend application (from database design to API development) for an e-commerce website using mainly ExpressJS (a NodeJS framework), MongoDB (a database platform), tested via Postman, and deployed through Render.

Capstone 1 Project: **Static Website Portfolio**

- Built a static website using HTML5, CSS, Bootstrap, and deployed through github.

SKILLS

Languages: HTML, CSS, and JavaScript

Frameworks and Libraries: Bootstrap, ExpressJS, and ReactJS

Tools: Git, Gitlab, Github, Sublime Text, Postman, MongoDB, and Robo3T

Plant Supervisor

Oct 2019 – Apr 2022

FCTEC Philippines Manufacturing and Trading Inc. • Carmona, Philippines

- Analyzed data and created reports to be submitted to the Vice President regarding processes.
- Oversaw the plant operation from incoming of raw materials up to delivery of finished goods to the customer.
- Attended meeting with the customer to discuss issues and concerns regarding the new product arrangement, product quality issues, delivery performance, request, etc.
- Assisted in the selection of new staff which includes resume review and final interview.
- Facilitated the incoming and transfer of new machines from installation to mass production.

Process Equipment Engineer Supervisor

August 2015 - Jul 2018

NT Philippines, Inc. Plant 2 • Rosario, Philippines

- Attended training overseas regarding the transfer of new technology or process from Mother Factory in Japan to Philippines for the establishment of new project.
- Lead the team in set-up and qualification of new imported machines.
- Successfully established a new production line from installation of new equipment to smooth production flow.
- Worked with equipment vendors and suppliers continuously to develop new methods to achieve low-cost maintenance system.
- Improved production yield by analyzing the issues and provide effective measures.

Process Engineer/PCO

Nov 2012 - Jul 2015

NT Philippines, Inc. Plant 2 • Rosario, Philippines

- Initiated the creation and implementation of process documents (Process Control Plan, Work Instruction, Procedure, Forms, etc.) on each process.
- Achieved daily, weekly, monthly, yearly target of machine's scheduled maintenance.
- Participated in the regular audit of QA Team such as ISO audit, internal line audit, customer audit, and supplier's audit.

Tooling Engineer

May 2011 - Oct 2011

APC by Schneider Electric • Rosario, Philippines

- Reviewed and approved products (Pressed Metal Parts) and documents (Process Control Plan, SOP/Work Instruction, Procedures, Forms, FAI/Cpk, etc.) from vendors.
- Communicate with colleagues from Schneider counterparts and vendors to ensure smooth project development.
